

# METHAMPHETAMINE USE IN AUSTRALIA

93%

of Australians  
have NEVER tried  
any form of meth

2%

of Australians  
have used any  
form of meth in  
the last year

70%

...of all meth users  
use less than 12  
times a year

15%

...of all meth users  
use once a month  
or more

15%

...of all meth users  
use once a week  
or more

Using methamphetamine once a week or more  
is associated with dependence

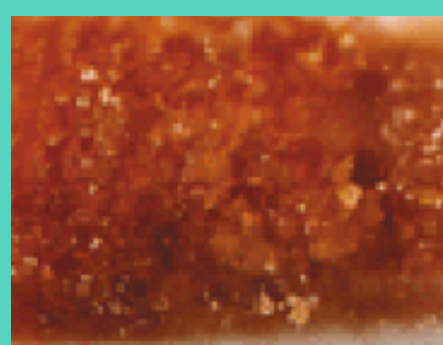

50%

of all meth users  
prefer crystal  
'ice'

40%

of all meth users  
prefer powder  
'speed'

10%

of all meth users  
prefer other  
forms

More users are switching from speed to ice. Ice  
is stronger and results in greater harms
